

MOBILE OUTDOOR BOILER ROOM

Unical outdoor boiler room with casing, an excellent solution that can always be placed in the most suitable place, next to the plant, building or on the roof.

The proposed solution is designed and built according to the customer's actual needs.

Possible set-up with a wide range of industrial boilers and accessories by Unical.

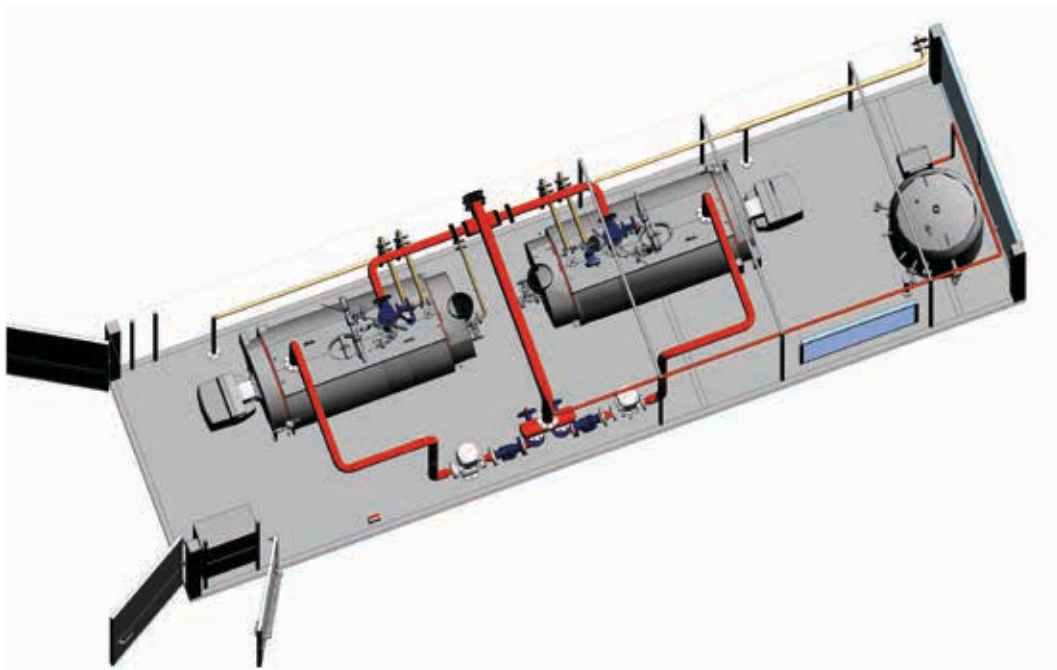

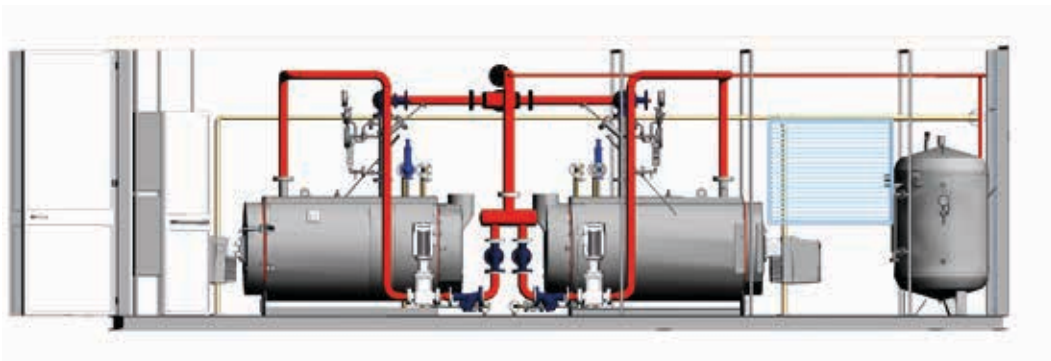

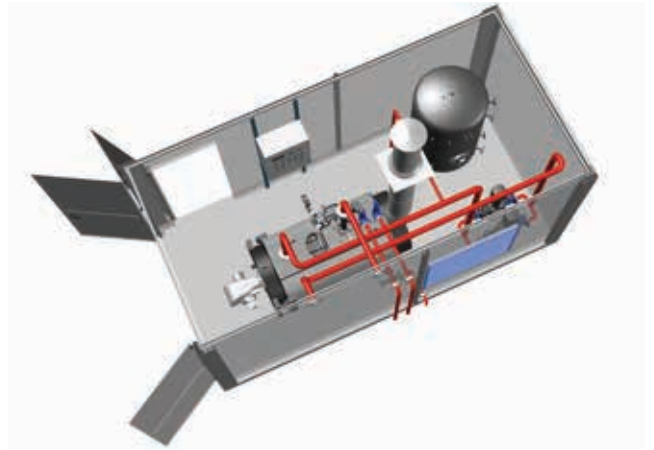

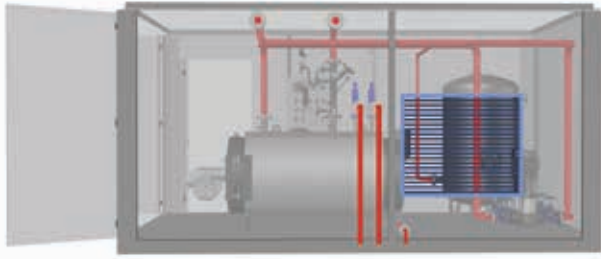

The boiler room is complete with all components required for operation, ready for use and embedded in a pre-assembled structure, with class 0 insulating sandwich panels, complete with pedestrian doors and double lead doors for easy access and maintenance.

All boiler rooms made by Unical comply with the Fire Brigade directive, with liquid and gaseous fuels.
